WWEC is the campus radio station of Elizabethtown College, Elizabethtown, Penna. It is owned and operated by the students with the approval of the college administration. It is a member of the Intercollegiate Broadcasting System. The threefold purpose of WWEC is to educate, entertain, and inform the student body of Elizabethtown College.

The station operates on a closed circuit AM system, and its outreach is limited to the general campus area. The general listening audience is approximately 900.

Major equipment includes a Gates "Studioette" Console, two Gates professional 16 inch turntables with Gray arms and General Electric variable reluctance cartriges and equalizers, a model 601 Ampes full track tape recorder, a 330 D. Scott AM-FM monitor tuner, and four electrovoice broadcast michrophones. The transmitter is custom built with a final power to plate of 25 watts, with heavy duty UTC high-fidelity transformers in the modulator.

The station broadcasts from a studio and a control room, both of which are 12x12 and are acoustically sound proofed and ventilated. They are located in the publications center of the new student center completed for use late in 1962.

WWEC now operates six hours per day from 6 p.m. to 12 midnight. Eight officers and twelve additional staff members operate the station. Newscasts are carried at 7, 9, and 11 p.m. with national, local, and campus items included in each newscast.

Funds used in the operation of the station are received from a radio station budget which is part of the Student Center budget. WWEC carries no commercial advertising.

Future plans call for an FM educational station with a free radiation system.

WMUC is the campus radio station of Muhlenberg College, Allentown, Penna. It is owned and operated by the students with the approval of the college administration. It is a member of the Intercollegiate Broadcasting System. The Thresfola Memorial Studio is to educate, entertain and inform the student body of Muhlenberg College.

The station operates on a closed-circuit AM system, and its output is limited to the campus area. The power output is approximately 200 watts.

Studio equipment includes a Rudolph "Consolette", two Gates professional 1A turntables with cartridges, two Gates turntables with Shure cartridges, and two Gates 1A turntables with Shure cartridges, a model CCI Amperex and two Shure microphones, a 25" D.C. Scope monitor scope, and two Shure microphones. The transmitter is a Gates 250 watt transmitter with heavy modulation.

The station broadcasts from a studio and control room, both located in Trexler Hall and are essentially sound proofed and new equipped. They are located in the publications center and new student center completed for use later in 1970.

WMUC is now operating 24 hours per day from 6 p.m. to 12 midnight. Staff operations are carried out by active technical staff members operating local, and campus items included in such messages.

Funds are provided in the operation of the station are received from a campus activities budget which is part of the Student Center budget. WMUC carries no commercial advertising.

Power plant consists of two an FM mono diamond station with a free radiation system.
